KIMS DU - faculty Of Dental Sci... x +

Not secure | kimskarad.in/faculty-dental-sciences/

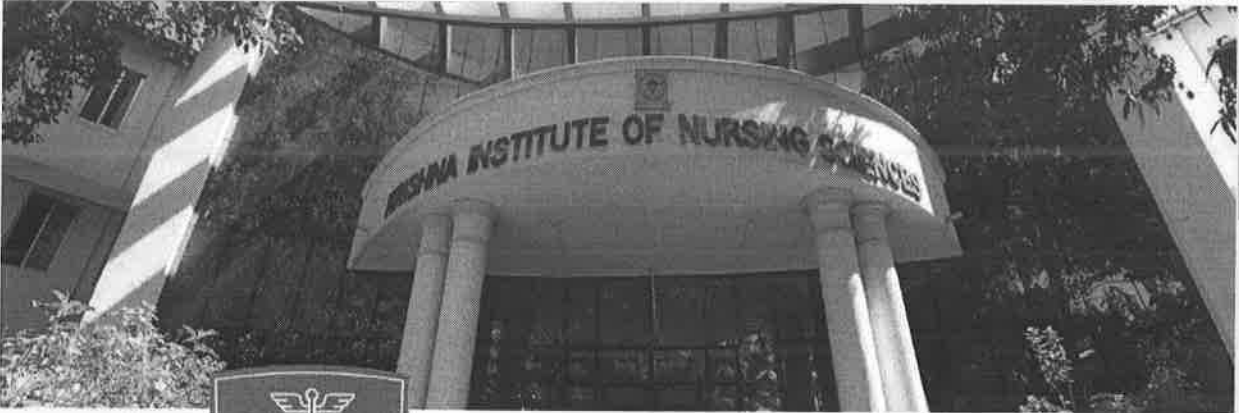

Faculty Of Dental Sciences

The School of Dental Sciences was started with the approval of the Dental Council of India in the year 2006. A massive state-of-art infrastructure to support 160 undergraduate and 23 postgraduate admissions with the installation of 283 electrically operated chairs, laboratories, instruments, materials and the appointment of an experienced faculty has seen it to grow into an institution of repute. The institution aims to address the dental care needs of the community while providing the

Faculty Of Nursing Sciences

From the early Christian period until the beginning of the 19th century nursing as a profession was neither clearly defined nor properly organized. It was Florence Nightingale who changed the public perception and attitude towards nursing with her extraordinary commitment and in the process laid the foundation of nursing as a profession with purpose & direction. Today the nurse with her skills and knowledge plays very important position in the health care organization. The

KIMSOU • Faculty Of Physiotherapy

Faculty Of Physiotherapy

Physiotherapy is a science which aims to accelerate a patient's recovery after illness or injury and seeks to restore and maintain physical function. It has a role to play in all age groups and in all branches of medicine. During the four and a half years course students undergo instruction in basic body structures & organs, their function, disease, recovery and rehabilitation encompassing the subjects of anatomy, physiology, biochemistry, pathology, microbiology, pharmacology, medicine, surgery, orthopedics, gynaecology, and sports medicine.

KIMSDU - Faculty Of Allied Sciences x +

Not secure | kimskarad.in/faculty-allied-sciences/

Faculty Of Allied Sciences

Faculty of Allied Sciences was established in 2007. Biotechnology involves the use of living organisms or their derivatives for generation of useful products for service. It has a potential impact on human health, food processing, environmental protection and agriculture. In medicine, production of antibodies, artificial vaccines and drugs like human interferon and gene therapy has given rise to new avenues of treatment. Mikroorganisms are also proving invaluable in treatment of effluents, sewage and for the
